Package Joomla Classes

Class JcrmController

[line 21]

jcrm Component Controller

- **Package** Joomla
- **Sub-Package** Jcrm

(void) function JcrmController::delete() *[line 290]*

Method to delete the data of the accounts selected and the contacts selected

- **Access** public

(void) function JcrmController::delete_account() *[line 146]*

Method to delete the data of jcrmaccount

- **Access** public

(void) function JcrmController::delete_contact() *[line 167]*

Method to delete the data of jcrmcontact

- **Access** public

(void) function JcrmController::delete_contactchild() [*line 186*]

Method to delete the data of jcrmcontact in the jcrmaccount

- **Access** public

(void) function JcrmController::display() [*line 29*]

Method to display the view

- **Access** public

(void) function JcrmController::getContacts() [*line 311*]

Method to define the format the jcrmcontactslist in the view

- **Access** public

(void) function JcrmController::listaccounts() [*line 206*]

Method to define the format of jcrmaccounts list in the view

- **Access** public

(void) function JcrmController::listcountries() [*line 239*]

Method to define the format of countries list in the view

- **Access public**

(void) function JcrmController::maxOrg() [*line 354*]

Method to get the name of the accounts whose id is maximum

- **Access public**

(void) function JcrmController::maxOrgid() [*line 371*]

Method to get the maximum id of the accounts

- **Access public**

(void) function JcrmController::restore() [*line 268*]

Method to restore the data of the accounts deleted and the contacts deleted

- **Access public**

(void) function JcrmController::save_account() [*line 101*]

Method to save the data of jcrmaccount

- **Access** public

(void) function JcrmController::save_contact() *[line 54]*

Method to save the data of jcrmcontact

- **Access** public

Class JcrmControllerCheck

[line 22]

jcrm Component Controller

- **Package** Joomla
- **Sub-Package** Jcrm

(void) function JcrmControllerCheck::check() *[line 61]*

Method to check all references selected

- **Access** public

(void) function JcrmControllerCheck::check_cont() *[line 112]*

Method to check contacts selected

- **Access** public

(void) function JcrmControllerCheck::display() [*line 32*]

Method to display the view

- **Access** public

(void) function JcrmControllerCheck::export_contacts([\$reqids = null]) [*line 192*]

Function Parameters:

- **array \$reqids** All the id of jcrmcontacts selected

Method to export all the jcrmcontacts to different types

- **Access** public

(void) function JcrmControllerCheck::export_vcf() [*line 250*]

Method to export every jcrmcontact to the type of vcf

- **Access** public

(void) function JcrmControllerCheck::ignore_cont() [*line 136*]

Method to ignore the contacts selected

- **Access** public

(void) function JcrmControllerCheck::insertAccountId(\$id_acct, \$cid) [*line 156*]

Function Parameters:

- **\$id_acct**
- **\$cid**

Method to update the organisation id in the references

- **Access** public

(void) function JcrmControllerCheck::insertContId(\$id_cont, \$cids) [*line 173*]

Function Parameters:

- **\$id_cont**
- **\$cids**

Method to update the contact id in the references

- **Access** public

Class JcrmModelAddressbook

[*line 26*]

Jcrm Model

- **Package** Joomla
- **Sub-Package** Jcrm

object JError function JcrmModelAddressbook::delete_account(\$id) [*line 329*]

Function Parameters:

- **\$id**

Delete a record of jcrmaccount:'set the state=0'

- **Access** public

object JError function JcrmModelAddressbook::delete_contact(\$id) [*line 351*]

Function Parameters:

- **\$id**

Delete a record of jcrmcontact:'set state=0'

- **Access** public

array function JcrmModelAddressbook::getAccounts() [*line 461*]

Returns the jcrmaccountslist to be published

- **Access** public

array function JcrmModelAddressbook::getChild() [*line 478*]

Returns the jcrmaccounts children list to be published

- **Access** public

(array) function JcrmModelAddressbook::getChildAccount(\$id_acct) [*line 520*]

Function Parameters:

- *int* **\$id_acct** The id of account selected

Returns the jcrmaccounts children list to be published

- **Access** public

array function JcrmModelAddressbook::getContacts(\$id_acct) [*line 498*]

Function Parameters:

- **\$id_acct**

Returns the jcrmcontacts children list to be published

- **Access** public

(object) function JcrmModelAddressbook::getContactslist() [*line 142*]

Gets the list of jcrmcontacts

- **Access** public

(object) function JcrmModelAddressbook::getId_acct() [*line 123*]

Gets the id of account from a selected contact

- **Access** public

object JPagination function JcrmModelAddressbook::getPagination() [*line 240*]

Gets the Pagination Object of jcrmaccountslist

- **Access** public

object JPagination function JcrmModelAddressbook::getPagination_contacts() [*line 274*]

Gets the Pagination Object of jcrmcontactslist

- **Access** public

int function JcrmModelAddressbook::getTotal() [*line 224*]

Gets the number of jcrmaccounts published records

int function JcrmModelAddressbook::getTotal_contacts() [*line 257*]

Gets the number of published jcrmcontacts records

- **Access** public

object JError function JcrmModelAddressbook::save_account() [*line 310*]

Save the data of jcrmaccount to the database

- **Access** public

object JError function JcrmModelAddressbook::save_contact() [*line 290*]

Save the data of jcrmcontact to the database

- **Access** public

Class JcrmModelCheck_contacts

[*line 23*]

Jcrm Model

- **Package** Joomla
- **Sub-Package** Jcrm

(*void*) function JcrmModelCheck_contacts::checkContacts(\$i_index, \$scids, \$first_name, \$last_name, \$email, \$org_name) [*line 479*]

Function Parameters:

- (array) **\$cids** All the id of references selected to be checked
- (string) **\$first_name** The first name of contact selected in the reference
- (string) **\$last_name** The last name of contact selected in the reference
- (string) **\$email** The email of contact selected in the reference
- (string) **\$org_name** The organisation name of contact selected in the reference
- **\$i_index**

Check the contacts of references

- **Access** public

(array) function JcrmModelCheck_contacts::checkOrg(\$i_index, \$cids) [line 299]

Function Parameters:

- (array) **\$cids** All the id of references selected to be checked
- **\$i_index**

Check the organisations of references

- **Access** public

(array) function JcrmModelCheck_contacts::getAccountWords() [line 258]

Gets the soundex name of all names in the jcrmaccounts

- **Access** public

(array) function JcrmModelCheck_contacts::getContacts() [line 99]

Gets the data of contacts from references

- **Access** public

object JPagination function JcrmModelCheck_contacts::getPagination() [*line 699*]

Gets the Pagination Object

- **Access** public

int function JcrmModelCheck_contacts::getTotal() [*line 716*]

Gets the number of published references

- **Access** public

(void) function JcrmModelCheck_contacts::ignoreContact(\$id) [*line 594*]

Function Parameters:

- *(string)* **\$id** The id of reference selected

Method to ignore the contact(s) selected of references:set id_contact=0

- **Access** public

(void) function JcrmModelCheck_contacts::insertAccountId(\$id_acct, \$id_ref) [*line 634*]

Function Parameters:

- *(int)* **\$id_acct** The id of account found in the jcrmaccounts
- *(string)* **\$id_ref** The id of reference to be updated

Method to update the organisation id in the references

- **Access** public

(void) function JcrmModelCheck_contacts::insertContId(\$id_cont, \$id_ref) [*line 668*]

Function Parameters:

- *(int)* **\$id_cont** The id of contact found in the jcrmcontacts
- *(string)* **\$id_ref** The id of reference to be updated

Method to update the contact id in the references

- **Access** public

(array) function JcrmModelCheck_contacts::multi_array_sort([\$multi_array = array()], \$sort_key, [\$sort = SORT_ASC]) [*line 231*]

Function Parameters:

- **\$multi_array**
- **\$sort_key**
- **\$sort**

Gets list of array after being sorted

- **Access** public

(array) function JcrmModelCheck_contacts::_buildContentOrderBy() [line 190]
Gets the list of contacts from references after being filtered

- **Access** public

Class JcrmModelContact_form

[line 23]

Jcrm Model

- **Package** Joomla
- **Sub-Package** Jcrm

(array) function JcrmModelContact_form::getAccounts(\$search_value) [line 101]
Function Parameters:

- *string* **\$search_value**

Gets the data of jcrmaccount selected

- **Access** public

(array) function JcrmModelContact_form::getCountry() [line 135]

Gets the emundus countries list

- **Access** public

(array) function JcrmModelContact_form::getData_cont() [*line 59*]

Gets the data of jcrmcontacts

- **Access** public

(int) function JcrmModelContact_form::getId_acct() [*line 80*]

Gets the id of jrmaccount selected

- **Access** public

(array) function JcrmModelContact_form::getMaxorg() [*line 153*]

Gets the name of accounts whose id is maximum

- **Access** public

(array) function JcrmModelContact_form::getMaxorgid() [*line 170*]

Gets the max id of accounts

- **Access** public

Class JcrmModelJcrmdeleted

[line 22]

Jcrm Model

- **Package** Joomla
- **Sub-Package** Jcrm

(boolean) function JcrmModelJcrmdeleted::deleteAcct(\$cids) [line 143]

Function Parameters:

- (array) **\$cids** All the id of accounts to be deleted

Delete the data of jcrmaccounts selected from database

- **Access** public

(boolean) function JcrmModelJcrmdeleted::deleteCont(\$dels, \$cids) [line 165]

Function Parameters:

- (array) **\$cids** All the id of accounts to be deleted
- **\$dels**

Delete the data of jcrmaccounts selected from database

- **Access** public

(array) function JcrmModelJcrmdeleted::getCont() [*line 66*]

Gets the data of jcrmcontacts deleted(state=0)

- **Access** public

(array) function JcrmModelJcrmdeleted::getData() [*line 48*]

Gets the data of jcrmaccounts deleted (state=0)

- **Access** public

(object) function JcrmModelJcrmdeleted::restore_acct(\$cids) [*line 86*]

Function Parameters:

- (array) **\$cids** All the id of accounted to be restored

Restore the data of jcrmaccounts selected:set state=1

- **Access** public

(object) function JcrmModelJcrmdeleted::restore_cont(\$dels) [*line 115*]

Function Parameters:

- (array) **\$dels** All the id of contacts to be restored

Restore the data of jcrmcontacts selected:set state=1

- **Access** public

Class JcrmModelOrganisation_form

[line 21]

Jcrm Model

- **Package** Joomla
- **Sub-Package** Jcrm

(string) function JcrmModelOrganisation_form::getAccountname() [line 127]

Gets the name of jcrmaccount selected

- **Access** public

(array) function JcrmModelOrganisation_form::getCountry() [line 91]

Gets the data of emunduscountries

- **Access** public

(array) function JcrmModelOrganisation_form::getCountryJcrm() [*line 109*]

Gets the data of jcrmcountries

- **Access** public

(array) function JcrmModelOrganisation_form::getData_acct() [*line 72*]

Gets the data of jcrmaccounts selected

- **Access** public

Class JcrmViewAddressbook

[*line 23*]

HTML View class for the Jcrm Component

- **Package** Joomla
- **Sub-Package** Jcrm

void function JcrmViewAddressbook::display([*\$tpl = null*]) [*line 27*]

Function Parameters:

- **\$tpl**

Class JcrmViewCheck_contacts

[line 21]

HTML View class for the Jcrm Component

- **Package** Joomla
- **Sub-Package** Jcrm

void function JcrmViewCheck_contacts::display([\$tpl = null]) [line 25]

Function Parameters:

- **\$tpl**

Class JcrmViewContact_form

[line 24]

HTML View class for the Jcrm Component

- **Package** Joomla
- **Sub-Package** Jcrm

void function JcrmViewContact_form::display([\$tpl = null]) [line 28]

Function Parameters:

- **\$tpl**

Class JcrmViewJcrmdeleted

[line 23]

HTML View class for the Jcrm Component

- **Package** Joomla
- **Sub-Package** Jcrm

void function JcrmViewJcrmdeleted::display([\$tpl = null]) [line 26]

Function Parameters:

- **\$tpl**

Class JcrmViewOrganisation_form

[line 23]

HTML View class for the Jcrm Component

- **Package** Joomla
- **Sub-Package** Jcrm

void function JcrmViewOrganisation_form::display([\$tpl = null]) [line 26]

Function Parameters:

- **\$tpl**
